Of Lydia E. Pinkham's Vegetable Compound, the Great Woman's Remedy for Woman's Ills.

Yours for Health  
Lydia E. Pinkham

No other female medicine in the world has received such widespread and unqualified endorsement. No other medicine has such a record of cures of female troubles or such hosts of grateful friends as has

## Lydia E. Pinkham's Vegetable Compound.

It will entirely cure the worst forms of Female Complaints, all Ovarian Troubles, Inflammation and Ulceration, Falling and Displacement of the Womb, and consequent Spinal Weakness, and is peculiarly adapted to the Change of Life.

It has cured more cases of Backache and Leucorrhoea than any other remedy the world has ever known. It is almost infallible in such cases. It dissolves and expels tumors from the Uterus in an early stage of development.

Irregular, Suppressed or Painful Menstruation, Weakness of the Stomach, Indigestion, Bloating, Flooding, Nervous Prostration, Headache, General Debility quickly yield to it. Womb troubles, causing pain, weight and backache, instantly relieved and permanently cured by its use. Under all circumstances it invigorates the female system, and is as harmless as water. It quickly removes that Bearing-down Feeling, extreme lassitude, "don't care" and "want-to-be-left-alone" feeling, excitability, irritability, nervousness, Dizziness, Faintness, sleeplessness, flatulency, melancholy or the "blues" and headache. These are sure indications of Female Weakness, or some derangement of the Uterus, which this medicine always cures. Kidney Complaints and Backache, of either sex, the Vegetable Compound always cures. Those women who refuse to accept anything else are rewarded a hundred thousand times, for they get what they want—a cure. Sold by Druggists everywhere. Refuse all substitutes.

yielded in 1904 from 120 to 300 bu. per  
acre in 30 different States, and you, Mr.  
farmer, can beat this in 1905, if you will.

Speltz or Emmer, above illustrated,  
grows 80 bushels grain and four tons hay  
besides per acre. It's wonderful. Salzer's  
seeds are pedigree seeds, bred up through  
careful selection to big yields.

TOPICS OF INTEREST TO THE PLANTER, STOCKMAN AND TRUCK GROWER.

## Thirty Years' Experience in Berry Fruit Growing.

Thirty years old in any one line of business is quite patriarchal, for this has been a generation of changes and frequent adjustments and readjustments. It has not fallen to the lot of many men to hold to one thing for so near the third part of the century. I consider myself fortunate that fate has permitted me to bend virtually all the energies of my life to one thing, given me time and opportunity to master it in proportion to my abilities and to reap a reward that seems to me greater than my deserts. And still more fortunate am I in that I have had sons to grow up around me, profiting by my experience, to see more broadly and reach higher, making my plans and aims their plans and aims, but larger. But I am not writing a family history, but a treatise on fruit growing.

In that thirty years I learned many things and had to unlearn many things. What I had to chiefly unlearn was that the old system of manuring fruits was wrong. To me and to my average contemporaries in those days manure was manure and fertilizer fertilizer. It occurred to us dimly, if at all, that as different animals required different kinds of food and in different proportions, so did different plants and crops. And I will add that the loss from illy balanced manure and fertilizer in those dark days was enormous, and who will be bold enough to say that the dark days are even yet entirely past with all of us?

The three fertilizing properties which experience has proven should be added to the soil to make it productive are, as is well known, nitrogen, potash and phosphoric acid. All of these are essential, one as much as the other, but they are needed in different proportions on different soils and for different crops, and their blind and injudicious use works loss in many ways.

As nitrogen is the most expensive it is in that the greatest waste and loss occurs in the ignorant use of fertilizers. The loss is greater in berry fruit growing than in any other crop we have, because more fertilizer is used on this than is the custom on other crops and because the loss in quantity and quality through unwise manuring is so great in this crop.

My largest crops of fruit have always come from the most liberal use of fertilizer when rightly proportioned. My largest crops of disappointments have grown where the largest quantity of illy balanced fertilizer was used.

My experience is that a perfectly balanced berry fruit fertilizer should contain at least two and one-half times as much potash and twice as much phosphoric acid as it contains ammonia.

My plan in planting strawberries, dewberries, blackberries, raspberries, etc., is to apply cottonseed meal in the drills before the plants are set at the rate of 600 to 800 pounds to the acre. This is sown in the drills and mixed with the soil and listed on just before the plants are set in winter or spring. After that no more nitrogen is used in any form until after the crop is gathered the following year.

I depend upon plenty of potash and phosphoric acid to make the fruit. Nor have I ever failed in my whole experience to make a good crop except one year when hail destroyed about one-half. I apply potash in the form of sulphate of potash, which is decidedly the best form for all kinds of fruit, using about 100 pounds per acre, usually mixed with 300 pounds of acid phosphate or dissolved bone. This mixture I sow broadcast over the plants during late fall and winter. It will undoubtedly pay to use a somewhat large quantity of both of these fertilizers either broadcast before the plants are set or else by chopping in around and between the plants during the summer or early fall. Potash and phosphoric acid, as they are much less liable to be washed out and lost than ammonia is, can therefore be more liberally used without loss, as most of the fertility of this kind remains in the soil until taken up by the plants.

"I will add that the largest yield of strawberries which I ever heard of being made in this State was grown by myself under the system of fertilizing above described.

O. W. BLACKNALL.  
Kittrell, N. C.

Subsiding.  
A few years ago we saw some red clay land, containing little humus, sub-soiled eight to ten inches. The work was done with an excellent two-horse subsoiler drawn by two mules. That work was thrown away. Heavy spring rains solidified the clay. The zeal of the farmer doing the work was not according to knowledge. He knows better now. He will not repeat his error. But he is fully convinced of the great value of subsiding our clay lands.

## News of the Day.

It has been calculated that, taking the population of the whole world, there is one newspaper to every 82,600 persons. The United States supports 12,500 newspapers, of which 1,000 are dailies, these being round figures. Germany has 6,500 journals, of which 800 are dailies. England takes second place in the European record with 3,000 newspapers, of which 809 are dailies. France has nearly the same number.

## Odds and Ends.

It is understood that Denver will be selected as the site for the army and navy hospital which the Federal Government has been set aside. The majority of the commission in charge favors Denver, although two members advocated some site in Arizona.

The West Virginia Legislature adopted a resolution declaring against any change in the tariff laws.

# CAUGHT BY THE GRIP-- RELEASED BY PE-RU-NA.

## La Grippe is Epidemic Catarrh.

It spares no class or nationality. The cultured and the ignorant, the aristocrat and the pauper, the masses and the classes are alike subject to la grippe. None are exempt—all are liable.

Grip is well named. The original French term, la grippe, has been shortened by the busy American to read "grip."

Without intending to do so, a new word has been coined that exactly describes the cause. As if some hideous giant with awful grip had clutched us in its fatal clasp.

Men, women, children, whole towns and cities are caught in the baneful grip of a terrible monster.

Have you the grip? Or, rather, has the grip got you? If so, read the following letters.

These testimonials speak for themselves as to the efficacy of Peruna in cases of la grippe or its after-effects:

## A Southern Judge Cured.

Judge Horatio J. Goss, Hartwell, Ga., writes: "Some five or six years ago I had a very severe spell of grip which left me with systemic catarrh."

The attack upon the divorce laws and upon divorce suits continue, in the pulp and to some extent, in the press. The real difficulty with reform is not the unwillingness of public bodies to act, says the Newark Sunday Call, but the feeling that the remedies suggested for the unhappy growth of divorce are not satisfactory.

## CONSTANT ACHING.

Back aches all the time. Spoils your appetite, weakens the body, worries the mind. Kidneys cause it all and Doan's Kidney Pills relieve and cure it.

H. B. McCarver, of 201 Cherry St., Portland, Ore., inspector of freight for the Trans-Continental Co., says: "I used Doan's Kidney Pills for back ache and other symptoms of kidney trouble which had annoyed me for months. I think a cold was responsible for the whole trouble. It seemed to settle in my kidneys. Doan's Kidney Pills rooted it out. It is several months since I used them, and up to date there has been no recurrence of the trouble."
